**DETAILED ACTION*****Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

<u>GROUP</u>	<u>FIGURE</u>
I	2
II	3
III	not shown (relates to claim 1 having coating only on first seal element)
IV	4

\*\*\* Applicant should note that there is no figure for the embodiment of claim 9 (Group III). One should be provided. Also, there is not clear support for part of claim 9 and 25. The specification does not provide support for the limitation: “a coating layer only on an outer side of said flange portion.” As seen in the figures, the coating is actually on part of cylindrical portion and the flange portion of the first seal element. Correction of these issues will avoid a drawing objection and 112 1<sup>st</sup> paragraph rejection in the next action.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 33 is generic.

Art Unit: 3673

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alison K. Pickard whose telephone number is 571-272-7062. The examiner can normally be reached on M-F (10-7:30), with alternate Friday's off.
